Paymentsite Enhanced with more Robust Reporting and more B2B Support

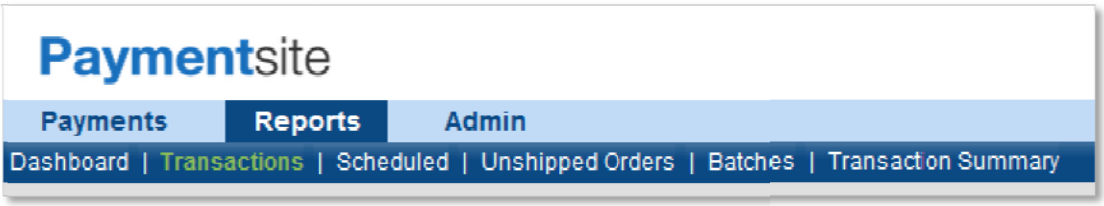
December 2010

At Maas Global, we believe in constant improvement, so we have listened to your input and implemented several of our current customers' suggestions into the Paymentsite Online Merchant Center. Paymentsite really is the next generation of payment management and now it's even better. Our customers have always appreciated the superior functionality and now we've added new features, more robust reporting and an improved interface.

This December release includes:

Better Design

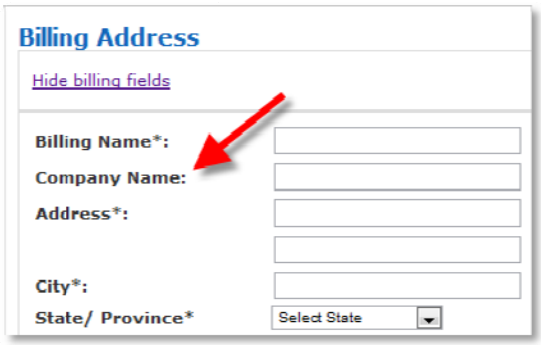
- Updated page design that shortens the header and updates the look, giving merchants a larger workspace and a more pleasing environment for processing and managing transactions



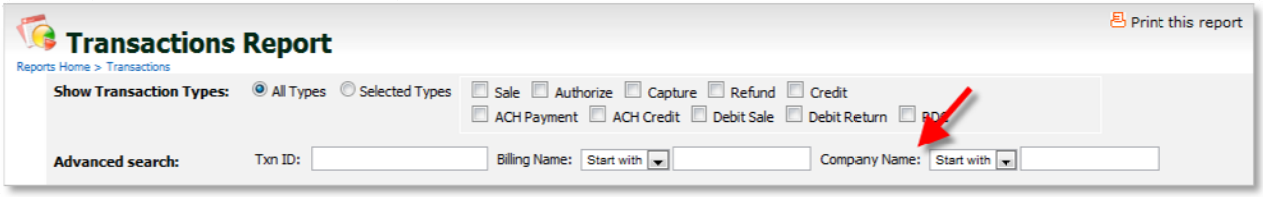
- Assorted updated graphics on most pages
- Date of Birth has been removed from the Payments page

Support for Business-to-Business Transactions

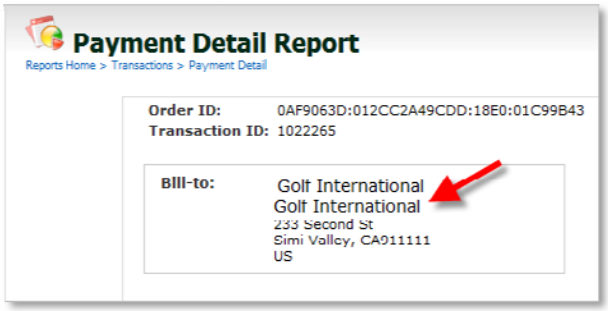
- B2B transactions require additional data elements so we've added ***Company Name*** as a field, plus several handy ways to use this new field
    - Merchants can enter a Company Name in the Billing section on the **Process Payments** page



- There is now a Company Name filter in the **Transactions Report**, so merchants can find all transactions for a specific company, and export them as needed

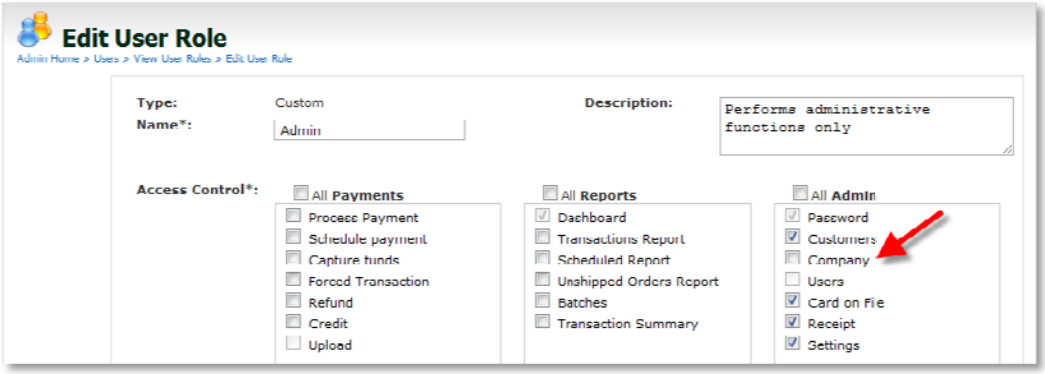


- Company name also shows in the **Payment Detail Report** and on the transaction receipt



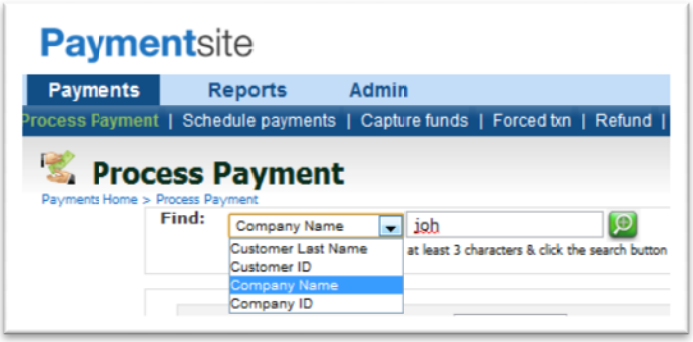
- Merchants can manage Company information in the Admin section—and then search on Company Name in the Payments pages by setting the Find dropdown to Company

- User access privileges now allow merchants to restrict permissions for updating company information to specific users.



Improved Customer Lookup

- Customer lookup is now at the top of the Payments page and allows merchants to search for:
  - Customer Last Name
  - Customer ID
  - Company Name
  - Company ID



Better Reporting

- A new **Transaction Summary** report which shows totals by payment type, providing a quick look at total transactions

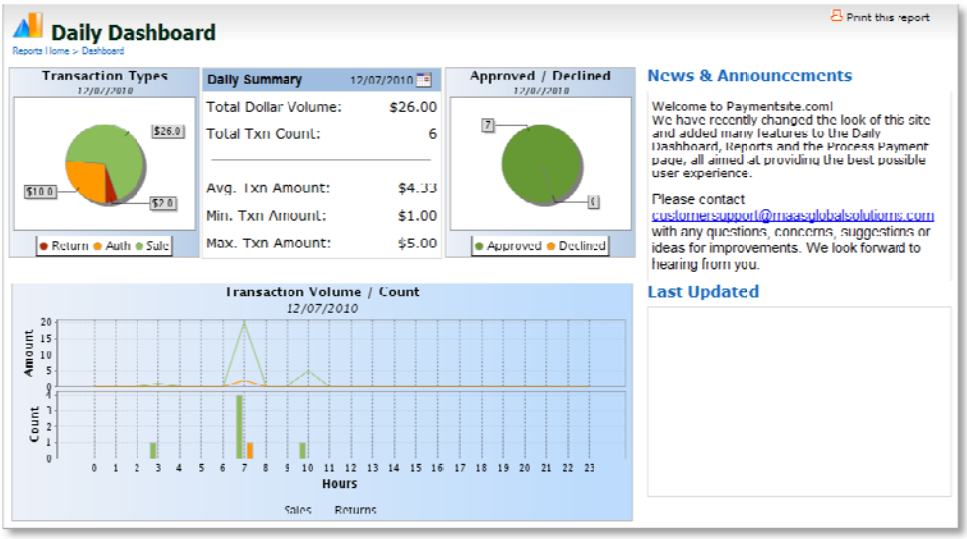
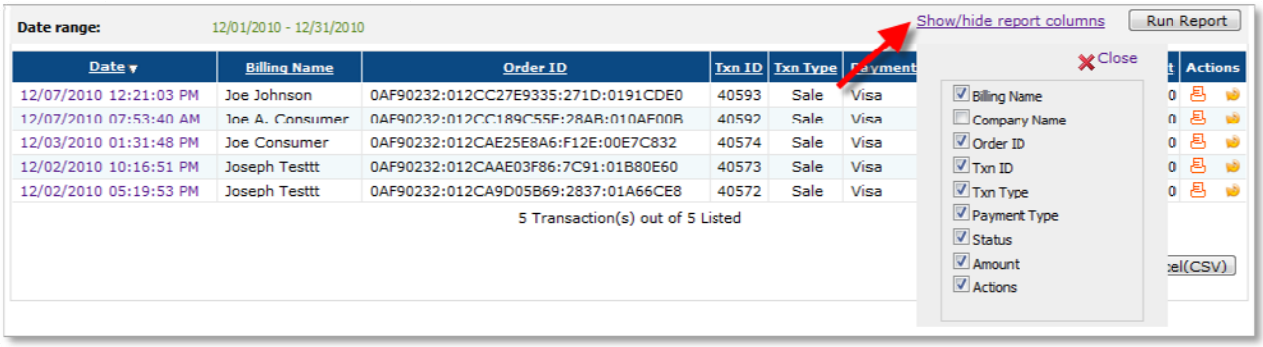
- **Updated Daily Dashboard** to include more charts and an improved layout for a better snapshot of the day's transactions

  - The **New and Announcements** box on the Dashboard is improved on the back end, enabling delivery of specialized content to white-label merchants



- Merchants can now hide or show columns in the **Transactions Report**, allowing them to focus on the information they need



If you have any questions about these improvements and how you can use them, please contact MGS Customer Support at (866) 293-4055 or email us at support@maasglobalsolutions.com.
